

Neil Horne - photographer

Eye Imagine Photography is Neil Horne, whose passion for photography remains as strong today as it did when he got hooked on printing black and white photos as a 12 year old.

Neil Horne is a highly talented and thoroughly professional, full-time, multi-award winning photographer. He is passionate about beautiful imagery and he specialises in people photography, from weddings and portraits to beauty and head shot photography. His wedding photography takes him across the UK and he is also recognised as a destination wedding photographer having photographed weddings throughout Europe, India, Mauritius, Dubai and Sri Lanka. Neil also works for commercial clients, both national and local, on an ongoing basis, including La Perla, IKEA, Launchpad, Cream Design, and Zero Degrees pizza restaurants.

Neil's other loves include travelling - with his camera never far away - and he has won the accolade of UK Travel Photographer of the Year for a stunning shot taken on a beach in Sri Lanka.

With his personal work, Neil has had two exhibitions, both at Reading Museum, and he is currently working on a new project photographing the varied music scene in the village where he lives, which he hopes to exhibit in 2019.

As an educator Neil has presented seminars for the BIPP (British Institute of Professional Photography) as well as for Epsom, workshops for companies including Nokia and Hicks Baker in Reading and one-to-one workshops for aspiring photographers and those who want to take their work to the next level.
